

Matas Bibliography

1. This is a brief explanation of the information in the different note fields that encountered in this bibliography. Notes: indicates where the citation came from. Several different bibliographies were consulted to create this master list, including Dr Matas' personal bibliography, and bibliographies compiled by various librarians and physicians throughout the 20th century. LIBRARY HAS: indicates Matas Library holdings. If there is no LIBRARY HAS: then the citation has not been verified as being possessed by Matas library. Some call numbers were placed after Note: or LIBRARY HAS: field, this means it is in our library. This bibliography is a copy of 2002 PDF bibliography compiled by Matas Librarians. It was reworked by Maureen Knapp in March 2014 to reduce PDF file size. For assistance email medref@tulane.edu
